

# The **best** equipment options for your **treatment goals.**

## CBCT and 2D Panoramic Imaging

We choose only high-quality machines and stand behind them, planning every detail of the installation and continuing to provide expert support for the life of the equipment.

## Intraoral Sensors & Camera

Our sensor & camera options are also selectively picked for only the best quality and value. We also include professional filter optimization, tailored to your diagnostic preferences.

## AI Insurance & Practice Automation

Automate repetitive and time-consuming insurance verification, billing, and payment posting to free up time for what's really important. Our system integrates with any PMS.

## CAD/CAM Technology

Dental TI offers industry-leading CAD/CAM equipment such as 3D printers and intraoral scanners to allow you to quickly provide high quality patient appliances, completely in-house.

# Expert **support** and **training** to keep your team on track.

Dental TI was founded in 1999 on the belief that dental technology should be accessible, affordable and come with thorough training and installation. That's why we believe that education is key when investing in new dental technology. We provide complete staff training, custom installation (including both the physical installation of the unit as well as integrating seamlessly with your current software and technology), and provide remote support after purchase to make sure you're getting the most out of your new technology. Find out how we can help your practice:

**Boost profitability**  
**Reduce downtime**  
**Optimize diagnostic images**

# Our clients are our **biggest fans** (and we're theirs!)

"We've used Dental TI for well over 15 years now. We first had them install intraoral cameras in all of our operatories. We have since purchased digital sensors, a digital pano and our newest purchase has been the addition of a Cone Beam within the last 18 months. Dental TI has always been great with service and any questions that we have had. Their training for the technology has been first rate as well."

"We wouldn't use anyone else for technology needs."

-Drs. Gordon and Brooks Green, Green Dental

## Solutions Our Clients Love:

# DENTAL TI

simplifying dental technology

# Experience the **Dental TI Difference.**

As a board-certified oral and maxillofacial radiologist, Dr. Bruno Azevedo, aka Cone Beam Guy, has distilled 17 years of clinical practice and over a decade of developing 3D imaging curriculums into his simple and highly effective teaching methodology to CBCT, "The Cone Beam Imaging Courses." His systematic approach to imaging encompasses four pillars of imaging: Acquisition, Data Correction, Data Navigation, and Data Interpretation.

Dr. Azevedo has partnered with Dental TI to create a custom CBCT education portal for our clients, which we include with all new CBCT purchases. Be ahead of your peers and get the most from your CBCT investment with over 11 hours of online lectures led by Dr. Azevedo.
